
ci-scripts
Release 1.19.0

Hermann Krumrey

Sep 05, 2020

CONTENTS

1	ci_scripts package	3
1.1	Submodules	3
1.2	ci_scripts.common module	3
1.3	ci_scripts.npm module	3
1.4	ci_scripts.php module	3
1.5	ci_scripts.progstats module	4
1.6	ci_scripts.release_upload_common module	4
1.7	ci_scripts.ruby module	4
1.8	Module contents	4
2	ci_scripts	5
3	Indices and tables	7
	Python Module Index	9
	Index	11

Contents:

CI_SCRIPTS PACKAGE

1.1 Submodules

1.2 ci_scripts.common module

`ci_scripts.common.decode_base64_string_to_file` (*content: str, dest: str*)

Decodes a base64-encoded string and writes the result to a file :param content: The string to decode :param dest: The destination file path :return: None

`ci_scripts.common.process_call` (*command: List[str], ignore_error: bool = False*) → str

Prints a command and executes it. If the exit code is not 0, the program will crash. :param command: The command to run :param ignore_error: Ignores any errors during a process call if True :return: The output of the command call, stripped of whitespace

1.3 ci_scripts.npm module

`ci_scripts.npm.install_package` (*package: str*)

Installs an npm package :param package: The name of the package to install :return: None

1.4 ci_scripts.php module

`ci_scripts.php.checkstyle` ()

Runs checkstyle on the PHP project :return: None

`ci_scripts.php.docgen` ()

Generates documentation :return: None

`ci_scripts.php.install_composer` ()

Installs composer locally :return: None

`ci_scripts.php.unittest` ()

Runs PHP unit tests :return: None

1.5 ci_scripts.progstats module

`ci_scripts.progstats.progstats_transfer` (*data: str, topic: str, project: str*)

Transfers progstats contents to the progstats instance using rsync :param data: The path to the data to transfer
:param topic: The progstats topic name :param project: The progstats project name :return: None

1.6 ci_scripts.release_upload_common module

`ci_scripts.release_upload_common.get_content_type` (*filename: str*) → str

Retrieves a sensible content type for a file :param filename: The name of the file :return: The content type of the file

`ci_scripts.release_upload_common.parse_args` () → Dict[str, Union[str, List[Dict[str, str]]]]

Parses command line arguments :return: A dictionary containing data required for uploading a release

1.7 ci_scripts.ruby module

`ci_scripts.ruby.gem_build` ()

Builds gem for project :return: None

`ci_scripts.ruby.gem_publish` ()

Publishes a gem :return: None

`ci_scripts.ruby.install_gem` (*gem: str*)

Installs a gem :param gem: The gem to install :return: None

`ci_scripts.ruby.make_sure_in_path` ()

Makes sure the ruby paths are in the system's PATH :return: None

`ci_scripts.ruby.rdoc` ()

Creates documentation using rdoc and rsync it for use in progstats :return: None

`ci_scripts.ruby.rubocop_test` ()

Tests the style of the ruby project using rubocop :return: None

1.8 Module contents

`ci_scripts.sentry_dsn` = 'https://82292407367d47869c03aa7756431d3d@sentry.namibsun.net/8'

Sentry DSN used for exception tracking
