
footballbot

Release 0.1.0

Hermann Krumrey

Jun 20, 2019

CONTENTS

1	footballbot package	3
1.1	Submodules	3
1.2	footballbot.FootballBot module	3
1.3	footballbot.FootballParser module	3
1.4	Module contents	4
2	footballbot	5
3	Indices and tables	7
	Python Module Index	9
	Index	11

Contents:

FOOTBALLBOT PACKAGE

1.1 Submodules

1.2 footballbot.FootballBot module

```
class footballbot.FootballBot.FootballBot (connection: bok-  
 kichat.connection.Connection.Connection,  
 location: str, db_uri: Optional[str] = None)  
  
Bases: kudubot.Bot.Bot  
Class that defines the behaviour of the bot  
classmethod extra_config_args () → List[str]  
 Returns The list of required settings parameters  
leaguemap = {'bundesliga': 'BL1', 'england1': 'PL', 'germany1': 'BL1', 'germany2':  
classmethod name () → str  
 Returns The name of the bot  
on_msg (message: bokkichat.entities.message.Message.Message, address:  
 kudubot.db.Address.Address)  
Handles received messages :param message: The received message :param address: The address of the  
sender :return: None
