	Index	11

Contents:

SAMSUNG_RU7179_REMOTE PACKAGE

1.1 Submodules

1.2 samsung_ru7179_remote.auth module

`samsung_ru7179_remote.auth.authenticate()`
Authenticates the system with the TV :return: None

1.3 samsung_ru7179_remote.commands module

`samsung_ru7179_remote.commands.valid_keys = {'0', '1', '2', '3', '4', '5', '6', '7', '8', ...}`
Valid keypresses

1.4 samsung_ru7179_remote.config module

`samsung_ru7179_remote.config.config_dir = '/root/.config/samsung-ru7179-remote'`
The config directory path

`samsung_ru7179_remote.config.config_file = '/root/.config/samsung-ru7179-remote/config.json'`
The config file path

`samsung_ru7179_remote.config.load_config() → Dict[str, str]`
Loads the config :return: The config

`samsung_ru7179_remote.config.write_config(config: Dict[str, str])`
Writes the config :param config: The config to write :return: None

1.5 samsung_ru7179_remote.key module

`samsung_ru7179_remote.key.execute_keypress(key_command: str)`
Executes a keypress on the TV A valid token must be in the configuration file :param key_command: The command to send. Should be one of the strings in
the `valid_keys` set in the `commands` module

1.6 Module contents

```
samsung_ru7179_remote.sentry_dsn = 'https://2a4227e5f0b644adab18a91adc8e57b1@sentry.namibsa.com'
    The Sentry DSN used for exception logging
```
